

**COMVAQWINGPAC
FUEL SURVEILLANCE
OJT CHECKLIST**

Regardless of rank or experience level this OJT is required training for all personnel involved with fuel surveillance. Previously completed OJT using COMVAQWINGPAC 1514/48 remains valid provided all updates to training since initial completion are incorporated in OJT record. For previously qualified personnel, attach this cover page (new) and route via chain of command for signatures. Final OJT qualification rests with the work center supervisor.

Work center supervisors may sign an item as qualified with no observations in the case of previously qualified personnel, or require additional observations for areas that the supervisor is not confident the person has mastered.

Tasks contained in this OJT are performed on a routine basis. Peculiar and non-common tasks are not part of this OJT and should be documented as they occur using OPNAV Form 4790/33. Items not pertinent to you TMS or mission will be lined out using pencil.

Periodic updates to this OJT are issued by COMVAQWINGPAC Maintenance Training as required. All personnel currently qualified or working toward qualification shall complete updated training requirements.

Maintain this checklist in the training jacket while in work and when completed. Make all entries in ink.
